

Radiant Architectural Lighting provides innovative lighting for projects around the world.

For more information about any of the products below, or any other solutions from our extensive range, please contact our team who will be happy to help, or arrange a virtual meeting to discuss your project.

Bridge 5, Amsterdam

Bridge 5, Amsterdam
Lighting design by Kees van de Lagemaat

Kees van de Lagemaat specified Radiant’s 3D LED Flex 40 IP66 System to illuminate the underside of Bridge 5, in the heart of Amsterdam.

A key entry point to the historic, UNESCO-listed Nine Streets district of central Amsterdam, Bridge 5 (unofficially named Raambrug, or Frame Bridge) underwent extensive renovation work in 2014.

Since reopening, Bridge 5 became a testbed for the city’s new, energy efficient LED bridge lighting system, with trials continuing until December 2015. Radiant’s lighting system played a central role in this bridge lighting improvement project.

The articulated modular system with elliptical beam lenses provides a light grazing effect of up to 5,000 Lumens per Mtr, and being fully flexible in 3 dimensions, is able to follow the irregular curved profiles of the historic bridge perfectly. Adjustable angle brackets allow the lit effect to be precisely aimed, and easily adjusted on-site by hand. The anti-glare snoot accessories ensure excellent visual comfort.
