

## Water Effect Lighting System 150 Oak IP65

Exterior, DMX controlled, dynamic LED effect lighting system with European Oak housing

### Water Effect Lighting System 150 Oak IP65

Exterior, DMX controlled, dynamic LED effect lighting system with European Oak housing

#### Product description:

Wall-mounted luminaire which incorporates a series of LEDs with different colour temperatures run by a DMX controller which, in combination with one or two textured glass optics, creates abstract light patterns that can be customized for each project

A wide range of white LED colour temperatures and CRI options and coloured LED options can be incorporated in this system. Custom light-engines - each LED in the array can be specified

Warm LED colour temperatures can be specified to reduce the impact on local wildlife

The systems do not rely on any moving parts, giving a long working life of up to 100,000 hours

The housing is made from European Oak with an oil-based finish

Low embodied carbon solution - carbon calculations and TM 65 & TM 66 reports are available on request

Integral mains voltage AC to DC DMX driver/controller, 230 V AC input or remote DMX driver/controller

Light output up to 1,500 lumens with all LEDs on full power

Up to 1,500 Lumens

Product Code	IP	No. of DMX channels	No. of LEDs	LED Type	CRI	LED Colour or white LED Colour Temp.(K)	Optics
